Statement: Long-term Allegations of Government-Run Gang Stalking and Targeted Harm

This document records a first-person account alleging long-term, systematic harassment, intimidation, experimental abuse, and grave harms experienced by **Larry Hamilton** and **Lloyd Michael Hamilton**. The purpose of this statement is to preserve an official record of alleged incidents, dates, and impacts for the public record and for use in formal complaints, investigations, or legal proceedings.

Subject: Lloyd Michael Hamilton — Targeted from September 21, 1990 (age 13)

• Allegation: Subject to repeated campaigns of what is described as a "Government Gang Stalking" program over a period of 34+ years (on and off), comprising nine full campaigns.
• Consequences reported: Made homeless 13 times; hospitalized 3 times; detained/held in jail on 6 occasions (primarily 8-hour detention or “drunk tank” stays; one DUI arrest); subjected to non-consensual experimental exposure to directed energy/radiation; assaults and battery; chronic neurological and systemic health effects consistent with prolonged exposure to high-intensity directed energy.
• Description: Alleged covert use of modified directed-energy or electromagnetic technologies (referred to here as DEWs) aimed through building walls and residential structures, producing symptoms described as severe neurological disruption, internal organ dysfunction, and other debilitating effects.
• Dates/Timeline: First targeted on Friday, September 21, 1990. Ongoing incidents up to present. Nine distinct campaigns described by the subject, with escalating intensity and recurring patterns of in-home harassment and technological interference.

Subject: Larry (Lawrence) Hamilton — Targeted for 18+ years (on and off), deceased July 4, 2008

• Allegation: Subjected to repeated campaigns of "Government Gang Stalking" over a period exceeding 18 years.
• Consequences reported: Made homeless once; hospitalized once; jailed six times (all recorded as DUI arrests); imprisoned once; subjected to non-consensual experimental radiation exposure and repeated assaults; sustained severe chronic health decline culminating in death.
• Death: Died on Friday, July 4, 2008 (age 66) after being placed in a government-run hospital/nursing care home; the subject and survivors allege the death was caused or hastened by prolonged targeted exposure and mistreatment.
• Description: Reported symptoms mirror those described by Lloyd: acute neurological damage, internal organ dysfunction, trauma from assault/battery, and signs consistent with prolonged high-intensity electromagnetic or radiation exposure. The family alleges these actions constitute torture, crimes against humanity, and violations of international treaties and conventions including the Nuremberg Code and Geneva Conventions.

Alleged Methods and Modus Operandi

The following summarizes claims made by the declarants about methods they believe were used. This is a restatement of the subject's allegations and does not assert independent verification. Methods alleged include:
• Use of directed energy or pulsed electromagnetic systems (DEWs), possibly modified military or space-based technologies, producing localized heating, neurological disruption, and organ dysfunction.
• Covert placement of recording devices inside everyday household objects (for example: replicas of alarm clocks, wall clocks, or smoke detectors) to capture audio or video without consent.

• Orchestrated social, employment, medical, and legal pressure campaigns to isolate and discredit targets (loss of employment, forced psychiatric treatment, record tampering).

Alleged Legal and Human Rights Violations

The subjects allege violations including but not limited to: conspiracy to commit assault and battery; torture; crimes against humanity; unlawful human experimentation; violation of international law (Nuremberg Code, Geneva Conventions); domestic and international terrorism statutes; and wrongful death. These allegations are the basis for the preservation of this record and for future legal and investigative actions.

Evidence & Attachments (Available on Request)

The declarant states they have compiled supporting material including: chronological logs, medical records, correspondence with authorities and media, witness contacts, and other documents. Copies can be made available to investigators or legal counsel upon request. The declarant requests that these materials be preserved and reviewed by appropriate oversight or investigative bodies.

This statement is provided to preserve a detailed account of alleged long-term abuse, to serve as a public record, and to support any future legal or investigative efforts. The declarant seeks accountability, transparency, and a thorough independent inquiry into these claims.

Signed,
Lloyd Michael Hamilton
Surrey, British Columbia
